■■ ANTI-PHISH QUEST: STAGE 2

ZERO-JARGON EMPLOYEE CHEAT SHEET · Spot fake emails. Stop fraud. Keep your company safe.

1. THE THREE-STEP CHECK

① **Check the sender address.** Look for extra letters, misspellings, or an unfamiliar domain. A familiar display name is not proof.

② **Stop on money or secret requests.** Treat urgent payments, bank-detail changes, gift cards, passwords, and “keep this secret” messages as warning signs.

③ **Verify by phone using a trusted number.** Use a number already saved in your company directory or vendor record—not one in the suspicious message. Complete required dual approval before money moves.

2. REPORT SUSPICIOUS EMAIL WITH ONE CLICK

OUTLOOK	GMAIL
1. Select the suspicious message. 2. Choose **Report** / **Report phishing** on the toolbar, ribbon, or … menu. 3. Confirm if prompted. Do not forward broadly or silently delete. 4. If missing, follow your company process.	1. Open the message only to access controls; do not click links or attachments. 2. Select **More (■)**. 3. Choose **Report phishing** and follow prompts. 4. Button names and availability depend on administrator settings.

3. OUT-OF-BAND WIRE TRANSFER AUTHORIZATION

Complete before changing vendor bank details or releasing a transfer.

Request date/time: _____	Requestor / department: _____
Vendor legal name / vendor ID: _____	Invoice, amount, payment reference: _____
Change requested (bank / ACH / wire): _____	Trusted callback number from existing records: _____
Person called / role: _____	Verification method and result: _____
Approver 1 name / date / time: _____	Approver 2 name / date / time: _____
Independent callback before payment? YES / NO	Evidence/ticket reference: _____
Final decision: APPROVE / REJECT / ESCALATE	Authorized staff updated details? YES / NO

STOP RULE: If independent verification or required approvals cannot be completed, do not change details or release payment. Escalate to Finance/Security.

A real-looking logo and urgent tone do not prove a message is genuine. Use your organization’s approved reporting tool and current policy. Training aid only; customize to your environment and insurer requirements.
